From bottle to filling

Recycled PET filling is made of plastic bottles and other packaging materials. During a unique process, the waste material is carefully sorted and washed. After grinding it, soft and supple flakes remain, an environmentally-friendly material that is the basis for all sorts of new products, such as the filling for our duvets and pillows. The use of rPET strongly reduces the CO₂ footprint and decreases the amount of waste. This will provide an carefree, peaceful and lovely soft night's sleep.

Pure Eco pillow and duvet

In our rental collection, we have been working with the Pure Eco line for a while; sustainably produced articles with a beautiful quality. A collection with two labels, with which you can really distinguish yourself. We now also offer the duvets and pillows in our purchase collection and this way, we take the next step in Corporate Social Responsibility together.

The recycled PET filling ensures voluminous, springy and anti-allergenic pillows and duvets. The covers are made of soft, pure, 100% organic and Fairtrade cotton, which complies with the strict demands of the Global Organic Textile Standard (GOTS). Honest, pure and clean! By combining an organic / Fairtrade cotton with a recycled PET filling, the ecological and social conditions as well as the stability of small scale producers are all taken into account.

Duvet

The Pure Eco duvet has a weight of 400 gr/m². The duvet is stitched with trapezoid shapes and can be washed up to 60°C and even be tumble-dried at a low temperature.

Pillow

The 60/70 Pure Eco pillow weighs 700 grams. The pillow can be washed up to 60°C and can be washed up to 60°C and even be tumble-dried at a low temperature.
